TIPS & TRICKS

EXPAND YOUR KNOW-HOW

Dear optician,

Besides our workshop tools catalogue, we are pleased to present the new version of our Accessories catalogue 2025/26. It contains six chapters for the product areas of sun, sport, cleaning, accessories, reading and safety.

Please note that there are separate catalogues for our children's glasses brand Milo & Me Eyewear and for the reading glasses from the I NEED YOU brand (see also pages A 70/A 71, E 2/E 3 and E 24/E 25).

For more information, please reach out to your local B&S-distributor. You can find a list of our global partners on our homepage www.b-s.de under "Worldwide".

Your Breifeld & Schliekert team

Contents 2025 / 26

Sun

Marking on frames and lenses	F22

B&S CLIP-ONS

FOR EACH CORRECTIVE
FRAME FIND THE
MATCHING CLIP-ON

Our fashionable clip-ons with rim and mirroring provide corrective frames with a fresh new look. All clip-ons without rim can be trimmed and can therefore be adapted to the individual size of the corrective frame.

NUMEROUS FEATURES AND TYPES OF FASTENING:

- To attach or clamp
- Extra slim mechanisms for a discrete appearance
- Flip-up function for a fast response time in changing light conditions

VARIOUS TINTS AND COLOURS FOR MANY APPLICATIONS:

- Grey, brown and green as sun protection
- Polarization against reflections on horizontal surfaces e.g. whilst driving or fishing
- Yellow and red tint for contrast enhancement
- Reflection and rear side AR coating for visual comfort

“Flip up” clip-on

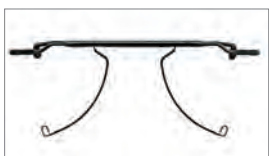

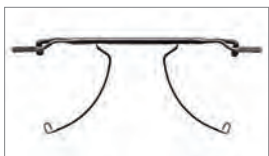

Rhodes

- Patented mounting system to allow simple and easy fitting
- Clip-on fits close to the lenses (approx. 2 mm) – removing annoying reflections
- Silicone buffer on the mounting avoids scratches on the lenses
- Easily and gently flipped up to three positions (60°/120°/180°)
- Polarising lenses

PLANO LENSES

ALWAYS THE RIGHT PLANO LENS FOR YOU

DESCRIPTION OF TERMS USED IN THIS CHAPTER:

MATERIAL

- Triacetate (TAC)
- CR-39
- Polycarbonate (PC)

TINT

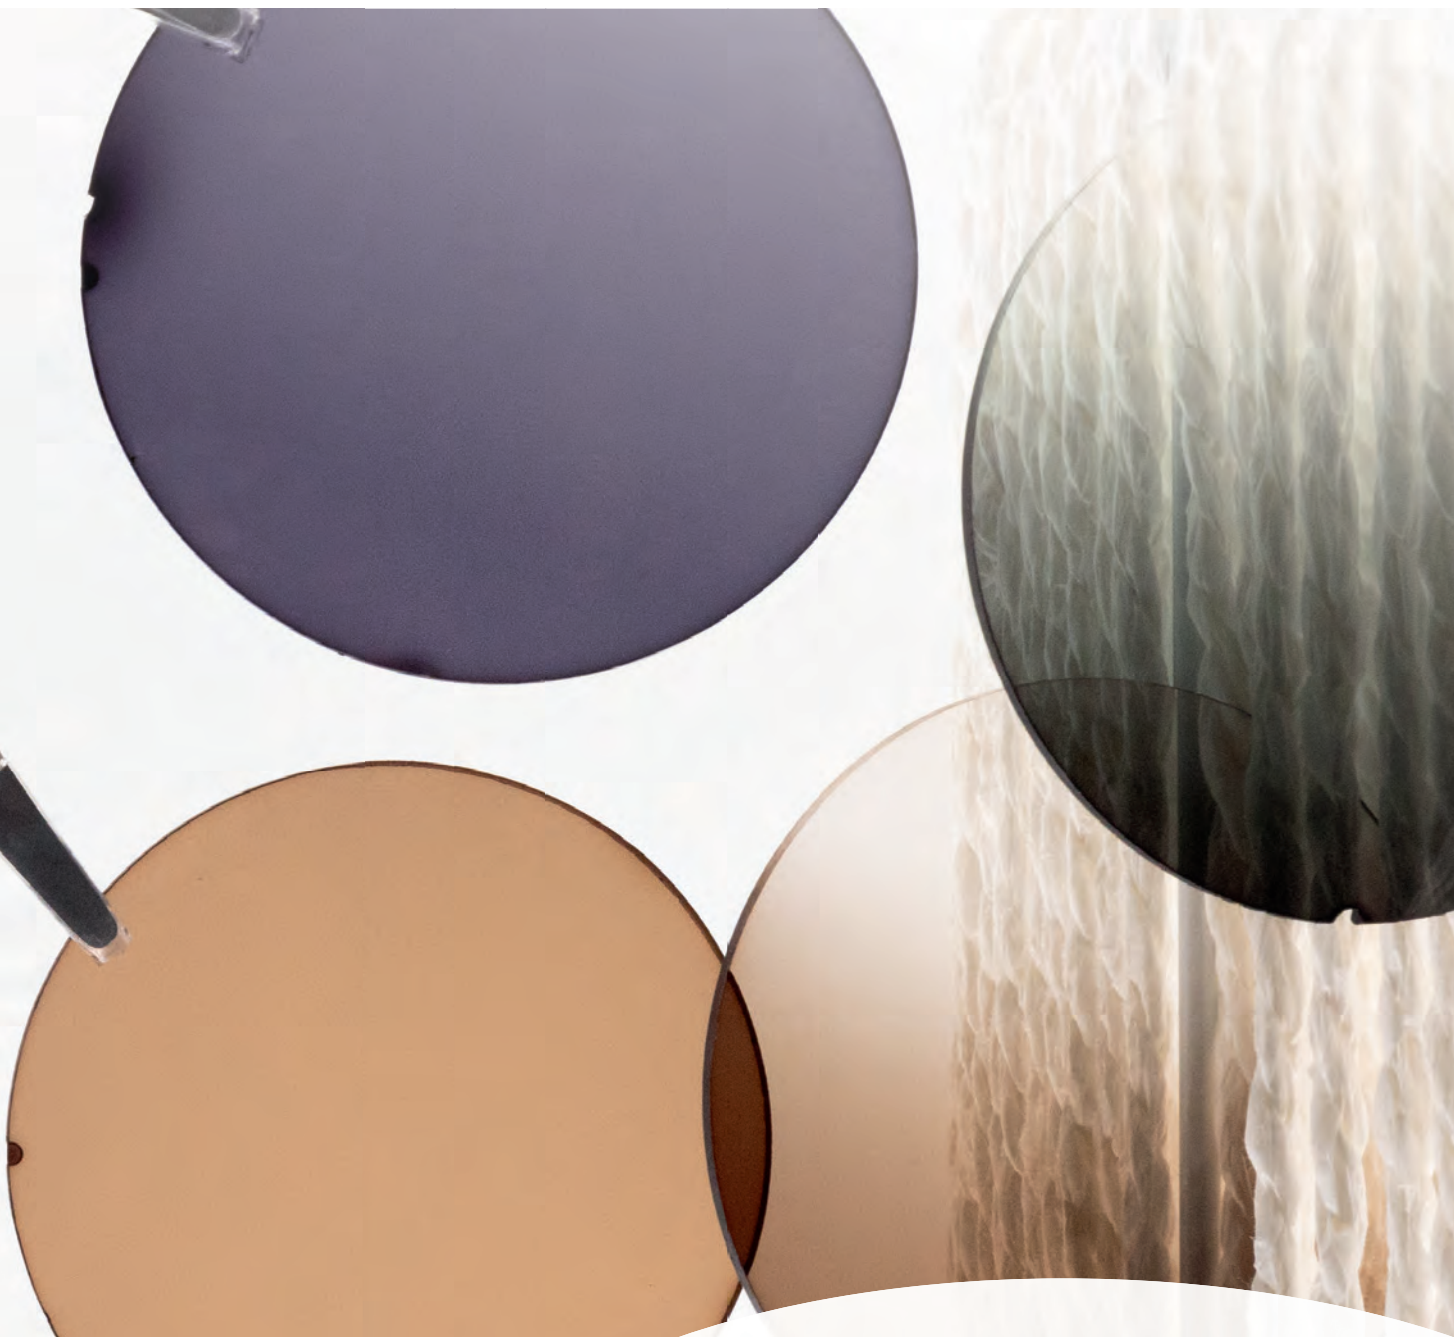

- Traditional filter colours in the most common tinting degrees
- Polarisation with or without AR coating
- Mirror coated lenses
- Transparent with or without AR coating

LENS THICKNESS

Some lenses are available in different thicknesses.

BASE CURVE

Various base curves for specific use

Advantages of polarising spectacle lenses

- Strong reduction of disturbing light reflections
- Improved contrast and more relaxed vision thanks to less glare
- Ideal for use whilst driving. Safer driving because of less distracting glare

Advantages of polycarbonate spectacle lenses

- Highly break resistant for children's, sports and safety glasses
- 100% UV-A- and UV-B-protection even with untinted lenses
- Additional tinting completes the sun protection

Triacetate plano lenses (tac)

With POLARISATION

- Suitable for flip-ups, clip-ons and sunglasses
- Approx. 70 × 60 mm
- Thickness 0.75 mm & 1.1 mm, easy to cut

 6 pieces

Orientation of polarisation: 

Brown – Thickness 0.75 mm

FITOVERS

FROM

Jonathan Paul[®]
FITOVERS

THE JONATHAN PAUL DIFFERENCE

The *Jonathan Paul*[®] *Fitovers* brand was developed over 20 years ago as a response to the intense sunlight of the southern hemisphere, especially on the Australian continent. Since then it has been considered a pioneer in overglasses, because it allows a protected and unrestricted spell in the sun for wearers of corrective glasses.

Jonathan Paul[®] quality overglasses are not only light and comfortable but also attractive in their fashionable variety. Whether classic, modern or avant-garde, the brand has now become a must-have if lifestyle solutions for being on the go are involved.

The range of glasses also offers outstanding characteristics in optical quality. Polarised polycarbonate glasses with their patented POLARVUE technology eliminate glare and ensure 100% protection against harmful UV-A- and UV-B rays. They are 6 times lighter and 20 times safer than glass.

SUPERIOR OPTICAL QUALITY

POLARVUE[®] • DUO HARDCOAT[®] • FLASH REFLECT[®] • REEZIST[™]

POLARIZED POLYCARBONATE LENSES

Eliminates glare and provides 100% protection from harmful UV-A and UV-B rays
Offers natural colour definition, superior visual acuity and enhanced contrast

TR90 FRAME MATERIAL

Unparalleled richness of colour and finish, preserving a quality appearance for longer time
Lightweight and resistant to stress cracking and material fatigue

SCOUT FIT TEMPLES

Designed to wrap around the back of the head so as not to interfere with prescription glasses
Never needs readjusting and avoids unnecessary pressure behind the ears

FINDING THE PERFECT FIT

At least as important as optical quality is the fit of the glasses – in particular if they are intended to be combined with corrective glasses. Using our size guide you can determine the optimal size for your overglasses..

SIZE GUIDE

1. Measure the outside height and width of your Rx frames with a ruler.
2. Choose the matching size:

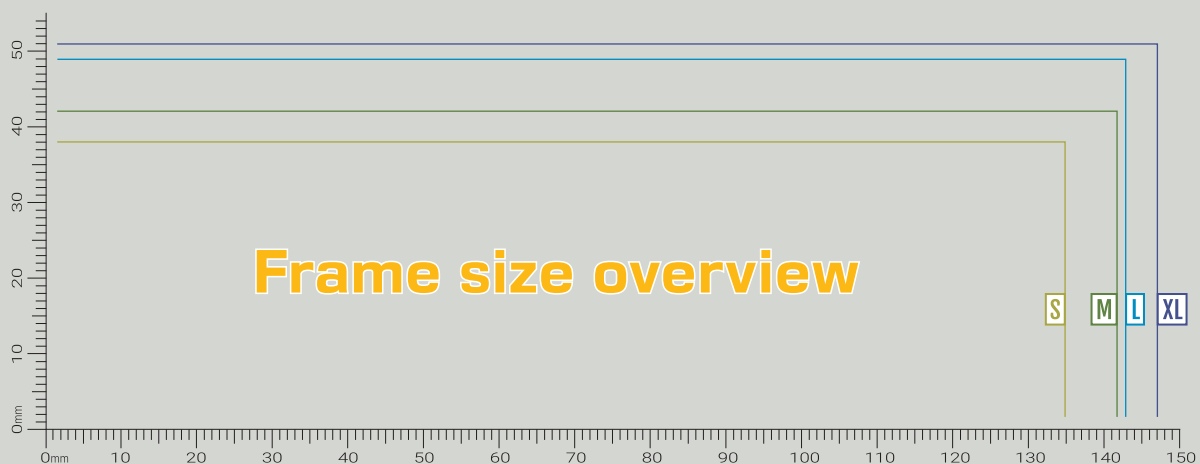

Size	Width x Height	Model
S	133 x 37 mm	AURORA
M	137 x 42 mm	ELEMENT
M	136 x 41 mm	DAHLIA
M	135 x 41 mm	IKARA
M	142 x 49 mm	TIMELESS

Size	Width x Height	Model
L	140 x 45 mm	COOL CLASSIC
L	140 x 43 mm	OOGEE
L	140 x 43 mm	ORION
XL	147 x 51 mm	AVIATOR
XL	146 x 44 mm	YAMBA

With the fitting diagram you will find all frame sizes marked in colour in the overview.

How to measure your frames:

1. Line up the left side and bottom of your frames to the comfort fit size guide, shown at left.
2. If your frames lay inside the guidelines for each size, they will fit that size. If your frames lay outside the guidelines for a particular size, they will not fit and you'll need a larger size.

B&S CLASSICAL OVERSPECS

*The ideal companion
FOR QUICK AND EASY
SUN PROTECTION*

SPECIAL FEATURES OF OUR OVERSPECS

- Our range has the perfect overspec for almost any corrective frame.
- Polarising lenses
- Delivered in a case with a microfibre bag.
- 100% UV-A- and UV-B-protection up to 400 nm

The size guide on page A42 helps you to find the right overspecs for your Rx-glasses.

For fashion-conscious customers many overspecs have a shallow design, sporty temples or are glazed with mirrored lenses. For a larger visual field some of our models have a side window in the temples.

Overspecs

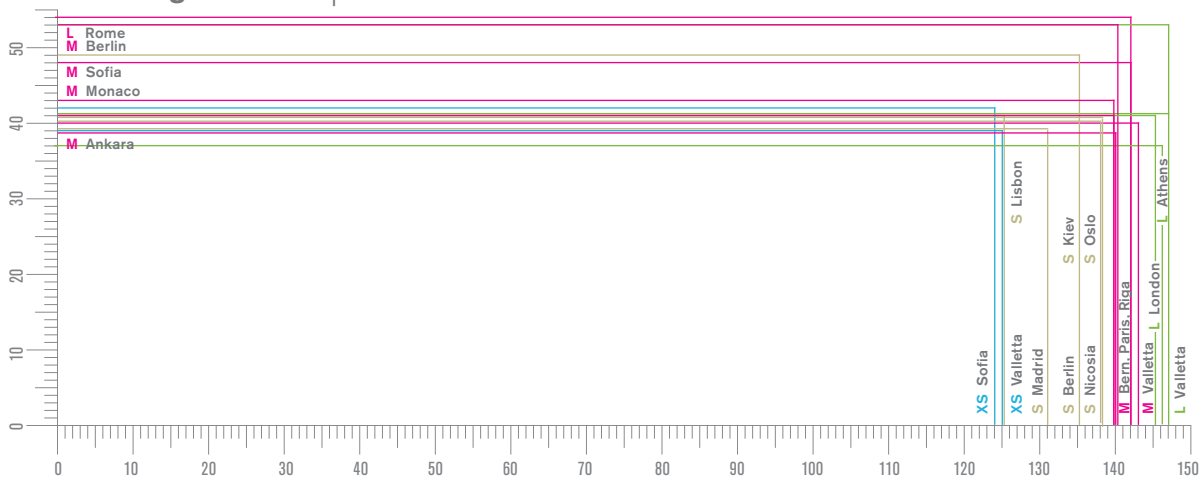

VARIOUS SHAPES & SIZES

- For children and adults
- All lenses are polarising, some are mirror-coated
- Some overspecs have ventilation slits

Includes case and microfibre bag

Size guide overspecs

All tinted lenses comply with EU standard regulations EN ISO 12312-1, are suitable for driving and have a 100% UV protection.

Polycarbonate, yellow (40% tint), enhance colour contrast, not suitable for night driving

Case and microfibre bag for storage

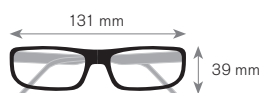

Havana
Brown (80–85% tint), polarising
120 7474 8960 21 S

Yellow tinted lenses neutralise blue light and thereby enhance the colour contrast. The lenses give clearer vision particularly in cloudy and foggy weather conditions.

- Contents not included
- Dimensions: 30×38×19 cm

Already some five years ago, we have launched our well established Milo & Me brand for kids ranging between 2 and 15 years of age in the segment of "eyeglasses for children". The frames, specifically designed to suit the behaviour of kids during play and movement, are made of plasticiser-free TPE material, flexible temple ends made of TR90 material and a 110°-groove for easy glazing. This means an all-round, hassle-free package for children, parents and opticians, for frames for both prescription

lenses and sunglasses. In addition to mobile presentation cases and various table displays, we provide attractive visual images and extensive giveaways for the presentation of the products.

The collection, which was launched in 2017 with initially only four models has almost quadrupled over time and is now established as a proper brand. You can view the full range of all available eyeglasses for children in our separate Milo & Me brochures.

SWIMMING GOGGLES

What to look out for
when choosing suitable
swimming goggles:

1. Swimming goggles with **silicone seals** have a higher durability than rubber seals. Overall, silicone is more flexible and tougher. Even regular contact with chlorinated water does not detract from its special properties. The material is also extremely soft and supple with remarkable impermeability.
2. The **head strap** is especially stretchy and individually adjustable. For quick and easy adjustment, even when the swimming goggles are being worn, the clasp should be found directly to the side of the eye cups.
3. The lenses are made from **impact-resistant polycarbonate**, which has outstanding material properties, such as resistance to saltwater and breakage, to ensure long-lasting swimming enjoyment. They provide total protection against penetrating UV radiation.
4. Clear or blue **lenses** are best suited for swimming in medium-level light conditions such as in an indoor pool in artificial light or in open water under cloud cover. Swimming goggle lenses featuring dark tint provide the best protection in strong sunlight. They make a great choice for open water swimming in lakes or outdoor pools.
5. A good pair of swimming goggles will already come with an **anti-fog coating**. To maintain this film for as long as possible, avoid touching the inside of the goggles, particularly when they are wet. Also, do not wipe the inside with a hand towel.

Swimming goggles

Fully assembled and as kits

B&S swimming goggle kits are ideally suited for recreational swimming, in the sea or at the swimming pool.

In addition to the unbeatable price-performance ratio, the fact that they are pleasant to wear and sit comfortably makes them a good, value-for-money alternative.

All swimming goggles also meet the British Standard for swimming goggles (BS 5883:1996) and feature total UV protection.

What is the proper fit for swimming goggles?

To find out whether swimming goggles fit correctly, they must be tried on before use.

The most important areas to be aware of are the **eye sockets and around the nose**.

It is easy to test for the **ideal fit** by holding the swimming goggles gently to the eyes, without attaching the head strap.

When goggles **fit perfectly, you feel gentle suction** and pleasant, uniform pressure around the eye.

For a customised fit in the nose area, swimming goggles should have adjustable or interchangeable nose bridges.

Combination swimming goggle

Turtle

- With plano lenses, pre-assembled
- New SWIPE technology
- The SWIPE anti-fog coating is reactivated at any time through rubbing the inside of the glass with your fingers

DIVING MASKS

What to look out for
when choosing a suitable
diving mask:

- 
1. The **mask strap** should not feel constricting but should nevertheless be a snug fit. Ideally, the part that sits at the back of the head should comprise two straps to prevent it from slipping off. A neoprene cover can prevent the mask strap from becoming twisted and makes it easy to put the mask on and take it off, which is particularly useful for long hair.
 2. **Tempered lenses** are break and scratch resistant and offer maximum protections with long lasting performance.
 3. A **seal edge** made of transparent silicone offers increased visual perception of the surroundings, making it easier to explore the world beneath the water. Conversely, black silicone seals the wearer off from distracting reflections in the water and is best suited for camera crew divers and underwater photographers.
 4. The **colour** yellow provides better visibility if the mask gets lost in the water.
 5. Diving masks for professional divers should withstand **dive depths** of around 100 meters. For diving on vacation or at the pool, dive depths of up to 30 meters are sufficient.

Professional diving masks from TUSA

Essential for all professional divers

Whether as a kit or as individual customer prescriptions, the diving masks from TUSA are a must-have for all professional divers.

The prescription range of sph. +0.50 dpt. up to -10.00 dpt. with cyl. +4.00 dpt. is exceptionally large and enables maximum visual acuity.

The prescription range is exceptionally large!

Diving mask

Is the diving mask sealed?

Fogging up of the lenses and the entry of water can be avoided only when the diving mask is completely sealed. Here are a few tips on how to ensure that this is the case:

1. Before the dive, check that the seal edge is not folded over and that the silicone lies flat against the skin.
2. The mask strap should be properly adjusted. This does not necessarily mean making the mask strap tighter if the mask is not sealed. A mask strap that is too tight can also cause a loose fit of the mask due to the seal being too compressed. It is important to take into account that the mask will have an even tighter fit under water due to the water pressure.
3. There should be no hair between the face and the mask. This aspect must be taken into account in particular if the wearer has long hair or a beard. Even one thin strand of hair can result in the mask not sealing properly.

CLEANING

HYGIENE AND SAFETY FOR OPTICIANS

Care, cleaning, hygiene – three elementary aspects – both for you as an optician and for your spectacle wearing customers

Everyone who wears glasses is familiar with the annoying fogging up of their glasses. It is always a big challenge to keep a clear view when changing from a cold to a warm environment. Various types of anti-fog agents offer remedy such as sprays, cloths or gels.

Crystal clear vision and perfect eyesight are no coincidence. "Cleaning" is the magic formula, and here again, we offer sprays, wipes and cleaning baths.

In the shop, at fitting tables and in your workshop hygiene in the workplace is a top priority. Direct contact with people requires a clean working environment at any time – an absolute must for professional customer service.

Anti-Fog

OptiPlus Anti-Fog lens wipes

A white marble plate is the central focus, resting on a black surface. On the plate, two silver-toned chains with lobster clasps and white, textured tips are visible. To the left of the plate, several dried, orange-brown flowers on thin stems are arranged vertically. The overall composition is clean and modern.

**CHAINS,
CASES & MORE**

From stylish fashion chains for your eyewear to specs cords for sports. We offer a wide range in many different styles and colours so that your customers will find the right one for their needs!

Small details help in everyday life, such as the lobster clasps on our chains and cords. These simplify the exchange of old loops or make it possible to wear the chains also as a fashionable jewelry chain. The sports retainers with stopper, or quick-release, fasten the glasses firmly to the head during sporting activities, and our floating cords are made of a special material so that the glasses do not sink very fast even in slight swell.

In addition to the option of attaching your customer's glasses to the usual loops, we also offer other mounting options such as expandable tube ends, lasso loops or silicone ends for 2 different attaching methods in one. No matter where the eyeglass straps and chains are to be fastened or whether the frame material is thicker or thinner, you will find a suitable solution.

CASES

This case makes you demonstrate your environmentally conscious attitude, in particular the reduction of plastics in our seas. Made from 100% paper, the case uses minimal resources and is completely biodegradable. Folded and with a light weight of only 10 g it can be transported in a space-saving way while still being stable when unfolded. Ideal as a free gift for a second pair of glasses.

Sustainable paper case

- Dimensions (L x W x H): 140 x 80 x 35 mm
- 100% paper case
- Weight: 10 g

**B&S READY READER
COLLECTION**

Discover our models!

At some point it comes to this. Your reading glasses become your indispensable companion in all of life's situations. Reading the menu, typing on your mobile or studying the operating manual – you can't do without them any more.

We offer a comprehensive range of the most varied reading glasses. Besides our premium brand, I NEED YOU, in this section you will find our competitively-priced own B&S brand in many different versions and in metal or plastic materials. In single-vision glasses from +1.0 to +3.5 diopters you can choose between timeless frames for every occasion, neckholder models with extra long sides and high-quality models with comfortable spring hinges.

Likewise, no limits have been placed on shapes or colours. Besides classic single-colour matt or transparent frames, frames with eye-catching colours or playful shapes create individual emphases for their wearers. Whether square, round or panto, or even in the cult style of the 50s as a cat's-eye shape – anything is possible. Our giraffe and okapi models have proven to be absolute bestsellers. Both have a conventional reading-glasses shape and a soft-touch surface which has a pleasantly soft and warm feel.

All B&S reading glasses have over 100% UV protection up to 380 nm. For even more intensive protection against the sun the Jaguar model is the right one, because it also has a magnetic sun clip. Furthermore our range includes reading glasses which can be quickly and easily placed on existing glasses to make reading easier. The hinge function has the advantage that when changing between distance and close-up the glasses do not continually need to be attached or removed.

By the way, all B&S reading glasses are supplied with a free case.

Our timeless acrylic displays for 4 or 6 frames are available for an appropriate product display on the fitting table or next to the till.

I NEED YOU

MILO & ME

For the 'children's prescription spectacles' segment, we offer our well established Milo & Me own brand for kids ranging between the ages of 0 and 15. The frames, specifically designed to suit the behaviour of kids during play and movement, are made of plasticiser-free TPE material, flexible temple ends made of TR90 material and a 110° groove for easy glazing.

The collection, which was launched in 2017 with initially only four models, has almost quadrupled over time and is now an established brand. This also includes special baby

frames whose shape and width are adapted to the smaller, wider bridge of babies' noses. They also do not have hinges or other metal parts and therefore meet the highest safety standards. The collection is rounded off with an extensive selection of sunglasses.

In addition to mobile presentation cases and various table displays, we provide attractive visual images and extensive giveaways for the presentation of the products.

You can view the full range of all available eyeglasses for children in our separate Milo & Me brochures.

A close-up, profile view of a man with a beard and short dark hair, wearing safety goggles with clear lenses. He is looking towards the right. The background is blurred, suggesting an industrial or workshop setting. The text is overlaid on the lower part of the image.

SAFETY GOGGLES
with plano lenses

MARKING

According to German Institute for Standardization, DIN

Identical and permanent markings on lenses and frames show that these safety goggles are in compliance with European Standard 166. The corresponding certification of the materials used is carried out at regular intervals by an independent testing institute and guarantees quality and durability for the various working areas.

IMPORTANCE OF LENS MARKING IN DETAIL

Mechanical strength:

- S Increased strength
- F Shockproof, low energy
- B Shockproof, medium energy

Additional requirements:

- 3 Resistance to liquids (drops, splashes)
- 4 Resistance to coarse dust (grain size $> 5 \mu\text{m}$)
- T Mechanical strength tested at extreme temperatures (+ 50 °C and - 5 °C).
This marking is always combined with the mechanical strength (e.g. FT).

Filter category:

- 2-3 Ultraviolet (UV)
- 4 Infrared (IR)
- 5-6 Sun protection filter
- 1.7-7 Welding filter
 - 1.7 Welding assistant
 - 3-5 Welding soldering
 - 5-7 Autogenous cutting
 - >7 Electric welding

The identification overview of our products can be found at the end of this chapter.

We would like to point out that existing lenses must not be changed, otherwise the certification as a protection goggles will be voided.

Plano metal safety goggles

- ProGrip anti-slip temple tips for a secure grip
- Side protection made of shatterproof polycarbonate (except Panto model with side protection made of metal mesh)
- Titanium frame for allergy sufferers (**item no. 120 8106 9729 21, 120 8108 9729 31**)

Chicago (HMR)

- Large field of vision
- Ideal shape for tinted lenses, e.g. when working outdoors
- Folding side protection made of acetate with interwoven metal mesh

WHAT WE
DO TODAY
DECIDES WHAT
THE WORLD
WILL
LOOK LIKE
TOMORROW

- Marie von Ebner-Eschenbach -

We encounter the concept of sustainability in almost all areas of life and business. However, it is often reduced to the aspect of environment, but it encompasses far more areas. Ultimately, the aim of sustainable action is to bring the economy, the environment and society into harmony. For us as a Company, this means aligning our corporate success to the three pillars of ecology, economy and social responsibility. As a company with almost 100 years of experience, Breitfeld & Schliekert has always stood for steady growth,

quality and safety. For us, it is a matter of course to enable future generations to further develop established values in a meaningful way and to leave behind a planet worth living on.

Below are some examples of our sustainable commitment, although we must admit that we are far from perfect. New findings and developments constantly present us with new challenges, which we meet with motivation and conviction. We thus continually strive to become a little better every year.

Ecology

Our building is 80% lit using innovative LEDs, with 80% energy savings.

Our packages are shipped CO₂-neutrally by using DHL GO GREEN/GLS THINK GREEN.

We have switched our power supply to 100% green electricity.

We are a certified partner of the DHL Green Logistics Portfolio for sustainable shipping of imported goods from Asia.

We promote digital working and are gradually converting to a paperless office, i.e. no physical dispatch of order confirmations, invoices and Christmas cards, for example.

For our products, we strive to minimize packaging material and outer packaging and to reduce the amount of plastic.

Our printed products are produced on PEFC or FSC certified paper from guaranteed sustainable forestry.

Economy

Our long-term corporate policy is based on securing locations and preserving jobs.

Our newly introduced ERP system optimizes work processes.

Our products are high quality and durable in keeping with the B&S tradition.

Meetings take place predominantly in video conferences, saving time and cost-intensive business trips.

We strictly comply with all current regulations and standards for our entire product portfolio according to the applicable legislation. These include: REACH; RoHS, WEEE and dangerous goods classification according to IATA and ADR.

We reduce fuel and CO₂ emissions through increasing use of electric vehicles and travel by train.

Social responsibility

We guarantee job security with permanent employment contracts for new hires.

We offer training and further education opportunities for our employees and are a recognized training company.

Our corporate culture is based on the principle of diversity and equal opportunities for all.

We allow working from home to balance family and career.

During the coronavirus pandemic, we provided our employees with high-quality masks certified to FFP2 standards and rapid antigen tests free of charge.

Our employees can refuel their vehicles at several e-fueling stations on the company premises.

We also offer our employees the use of a fitness studio as well as the purchase of a company bicycle or e-bikes through a salary conversion plan.

Space for Your Notes:

A series of horizontal dotted lines for writing notes, spaced evenly down the page.

This catalogue is again printed on certified paper – produced by sustainable forest management.
For more information about the B&S environment initiative visit our homepage: www.b-s.de

OUR CONTRIBUTION TO THE ENVIRONMENT: PAPER FROM SUSTAINABLE FORESTRY

Our new catalogue has 240 pages. With 6 languages and a total circulation of 11,900 catalogues, that makes approx. 3.1 million pages. With the estimated amount of paper needed, that makes the proud sum of approx. 193.966 m² of paper. That is almost approx. 9 tonnes of paper.

Fortunately, more and more customers and partners want to contribute to protecting the environment and switch to digital versions. In the last 5 years, we have more than halved catalogue production from over 25 thousand catalogues to 11,900 today. The latest German version is available on our homepage as a user-friendly flip catalogue and at the same time can also be downloaded.

Conforming to our ethos of acting as sustainably as possible, we have decided, together with our printer L.N. Schaffrath GmbH & Co. KG DruckMedien, to use a paper for the production of our catalogues that comes from a transparent processing chain: Artipress silk. **This wood-containing printing paper is PEFC certified, as is the printing company itself.**

The goal of PEFC is the documentation and improvement of sustainable forest management with respect to economically viable, ecological and social standards. Companies certified by PEFC show dedication to the environment and responsibility when working with the raw material of wood.

Here at Breitfeld & Schliekert we see the need to deal with our earth's limited resources responsibly and we try to implement this whenever possible to the best of our ability.

All contents of this catalogue, in particular texts, images and graphics are subject to copyright law and, to the best of our knowledge, correct at the time of printing. Unless stated otherwise, the copyright lies with Breitfeld & Schliekert GmbH. Please contact us if you want to use or publish content for your own purposes.

We cannot be held responsible for any errors in description or illustration and reserve the right to change specifications without notice.
