Marcia is wearing Timeless

THE JONATHAN PAUL® *Difference*

Jonathan Paul® has been leading the fitovers eyewear category since 1993. Started as a solution to the intense Australian sun, the category quickly proved to be equal parts comfortable, stylish and effective. It didn't take long for this revolutionary, fashionable and functional "fitover" sunglass to capture the attention of prescription eyeglass wearers worldwide.

Jonathan Paul has earned and maintained the reputation of designing the very best fitover sunglasses by utilizing premium materials.

Polycarbonate Polarized lenses – ***Optical quality*** and no distortion, 6 times *lighter* and 20 times *safer* than glass!

TR-90 Nylon frames – ***unparalleled color finishes, lighter*** in weight and resistant to damage

Jonathan Paul continues to raise the bar in designing products that deliver optical versatility and on-the-go, lifestyle performance.

SUPERIOR OPTICAL QUALITY

INJECTION MOLDED LENSES • POLARVUE® • DUO HARDCOAT® • FLASH REFLECT® • REEZIST™

POLARIZED, POLYCARBONATE LENSES

Eliminates glare and provides 100% protection from harmful UVA and UVB rays

Offers natural color definition, superior visual acuity and enhanced contrast

TR90 FRAME MATERIAL

Unparalleled richness of color and finish, preserving a quality appearance for longer time

Lightweight and resistant to stress cracking and material fatigue

SCOUT FIT TEMPLES

Designed to wrap around the back of the head so as not to interfere with prescription glasses

Never needs readjusting and avoids unnecessary pressure behind the ears

POLARVUE®
POLARIZED POLYCARBONATE LENSES

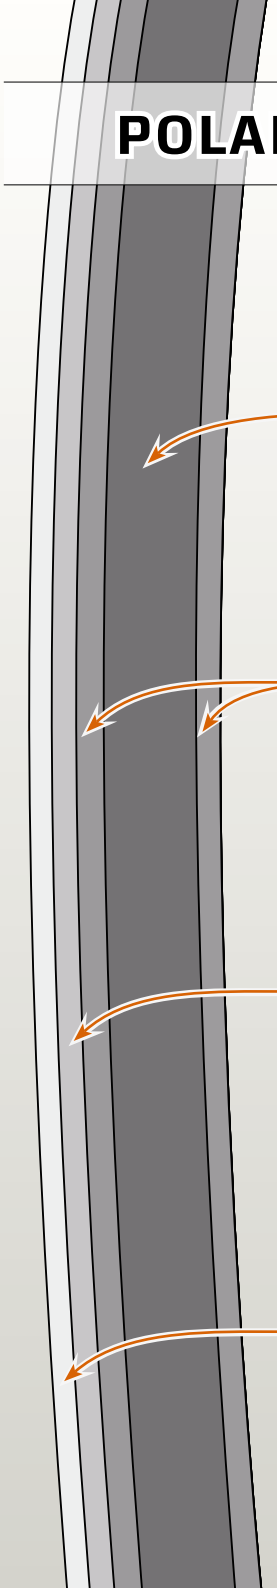
Jonathan Paul lens technology features patented POLARVUE which is proven to reduce glare more than traditional, non-polarized lenses.

The injection-molded polycarbonate construction has been engineered to match your optics to your environment.

Maximize performance by choosing the perfect balance of light transmission in a stylish, lightweight, and durable frame.

POLYCARBONATE LENSES ARE 6 TIMES LIGHTER AND 20 TIMES STRONGER THAN GLASS.

POLARVUE *lens structure*



Breaking down Polarvue lens layers

POLARVUE®
POLARIZED POLYCARBONATE

Polarvue lens construction is the exclusive and proprietary core of our lens technology.

DUO HARDCOAT
ANTI-SCRATCH

Duo Hardcoat offers two levels of protection against scratching by including a hard coat treatment on both the front and back surfaces of the POLARVUE® lens material.

FLASH REFLECT

Flash Reflect subtle flash silver mirroring adheres to the front of the lens, reflecting additional harmful glare while cosmetically hiding prescription eyewear behind the Fitovers sunglass lens.

REEZIST™
ANTI-SMUDGE

Reezist anti-smudge coating protects and shields from all elements that might come in contact with the lens: dust, water, fingerprints, smudges, and more!

POLARVUE POLARIZED LENSES

The optical quality injection-molded, polycarbonate lens construction has been engineered to ***match your optics to your environment***.

Jonathan Paul lens technology features patented POLARVUE proven to reduce glare more than traditional, non-polarized lenses.

Jonathan Paul Polarized Lenses block 99.9% of glare in addition to providing 100% UVA and UVB protection.

Jonathan Paul Polarvue polarized lenses have been produced to ensure the highest quality and long lasting durability through multiple manufacturing processes and treatments.

LENS COLOR	FEATURES & BENEFITS	WEATHER CONDITIONS & SUGGESTED USE	UV400 BlueLight Filter	LUMINOUS TRANSMITTANCE VALUE
G **Grey (non-mirrored)**	• Good for general purpose use • Reduce eye fatigue • Provides true color perception • Minimizes glare, especially off water • Darkest tint with highest available light reduction	• Bright sunny days • General purpose • Fishing/open water activities	**89.88**% blue light between 400 & 500 nm	**9.64**% visible light pass through
A **Amber (non-mirrored)**	• Good for variable everyday conditions • Heightens contrast & visual acuity by blocking large amounts of blue light • Especially useful to enhance contrast on grass and against blue skies	• Bright sunny days • Overcast conditions • Fishing, especially in waters with grassy bottoms	**96.72**% blue light between 400 & 500 nm	**10.16**% visible light pass through
Y **Yellow (non-mirrored)**	• Provides greater clarity in fog, haze and other low-light conditions • Filters out blue light from computer screens and other electronic devices that can cause eye fatigue and headaches • Provides excellent depth perception	• Low light – early morning late day • Improves visibility of objects and makes surroundings appear brighter	**91.51**% blue light between 400 & 500 nm	**30.75**% visible light pass through
PM **Grey Lens with Purple Mirror**	• Reflective coating applied to grey base lens • Trendy and aesthetically pleasing • Reduces glare by reflecting much of the light away from the eyes of the wearer • Makes objects appear 10% darker than than they are • Helps define contours • Enhances contour definition	• Bright sunny days	**88.97**% blue light between 400 & 500 nm	**10.52**% visible light pass through
BM **Grey Lens with Blue Mirror**		• Good everyday choice for activities in the full-sun on the water or land • Boating	**92.12**% blue light between 400 & 500 nm	**10.63**% visible light pass through
GM **Grey Lens with Green Mirror**		• Fishing in deep water	**86.37**% blue light between 400 & 500 nm	**10.72**% visible light pass through

CAMOUFLAGE COLLEKTION

The new camouflage collection consisting of the five models "Element", "Neera", "Oogee", "Yamba" and "Aviator" has been inspired by patterns of nature such as the fur of a leopard or the skin of a snake. Thus those frames get a completely new style – as individual as their wearer. Originating in the adaptation to natural surroundings, today camouflage patterns have become trendy fashion. No matter whether during an outdoor adventure or a relaxed city trip, Jonathan Paul Fitovers are a real eye cather.

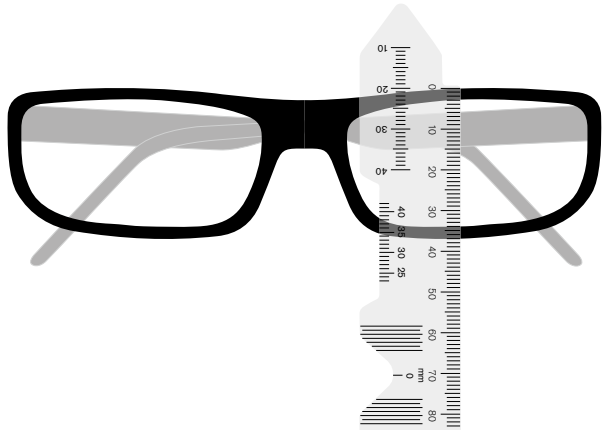
Jonathan Paul® FITOVERS

FINDING THE *perfect* FIT

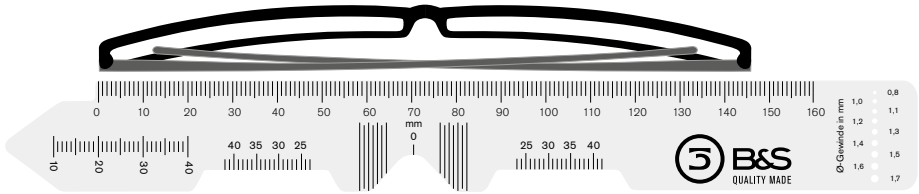
We understand all too well the importance of optimal frame fit when pairing with your existing prescription eyewear, particularly in striving to get the most out of your day, whether around town, in the outdoors, or anywhere in between. We designed our Comfort Fit Chart and Online Fit Guide to remove the guesswork and ensure you find the perfect fitover frame style each and every time.



ONLINE FIT GUIDE

Go to fitovers.com/whatsmysize

1. Measure the outside height and width of your Rx frames with a ruler.
2. Enter the measurements into the form fields of the online fit guide. Click “Find Matches”

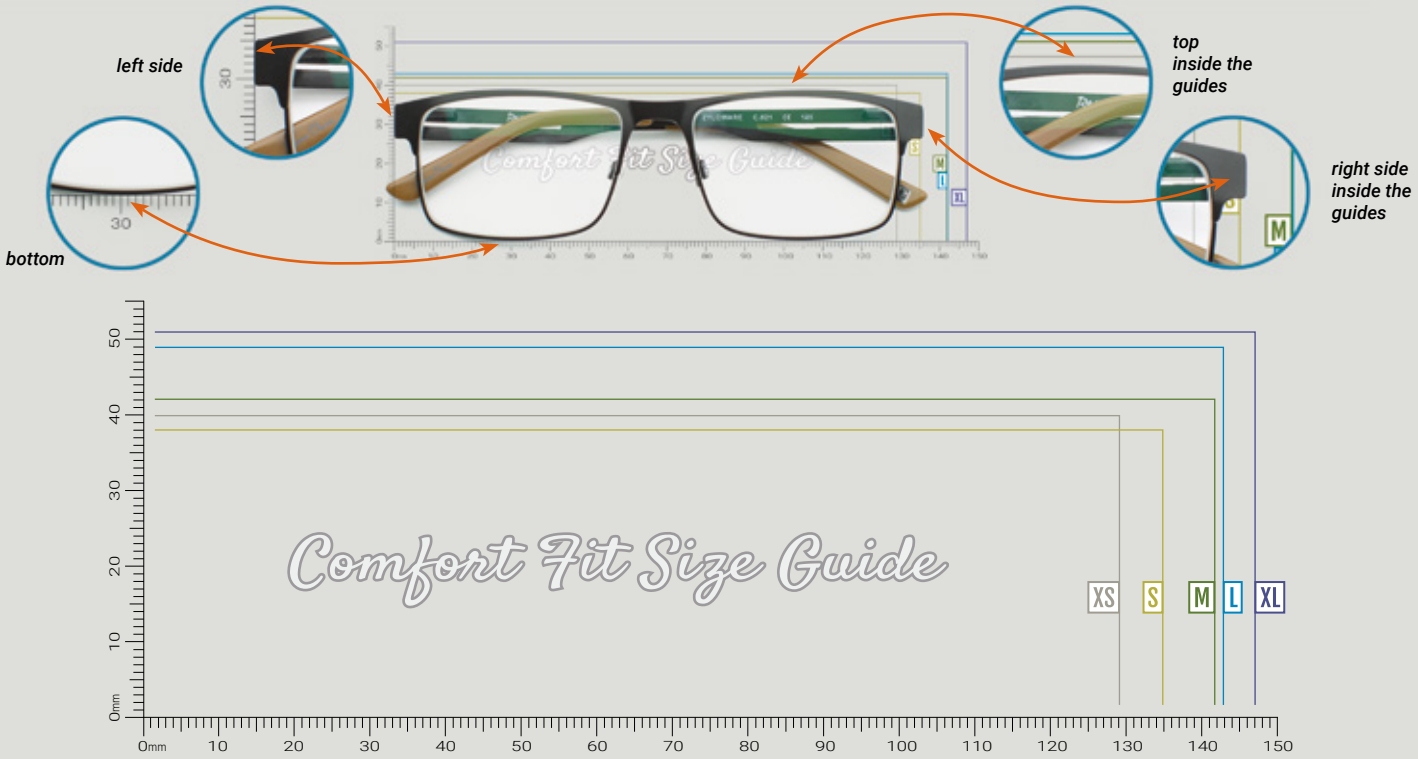


Josh is wearing Yamba

TIP

For the best fit, choose a fitover frame that is ***slightly larger in width and height*** than your prescription frame measurements. For the most optimal results, our WHAT’S MY SIZE tool on **fitovers.com** is designed to display compatible frame results from closest fit on the top, to widest fit on the bottom, with a 5 mm variance.

FIND THE PERFECT FIT USING THE COMFORT FIT SIZE GUIDE



Measure your prescription frames by placing them on the size guide to find your perfect Jonathan Paul Fitovers frame size

How to measure your frames

1.
Line up the ***left side*** and ***bottom*** of your frames to the comfort fit size guide, shown at left

2.
If your frames lay inside the guidelines for each size, they will fit that size.

If your frames lay outside the guidelines for a particular size, they will not fit and you'll need a larger size.
